

NX522W RADIOSCOPIQUE INSPECTION SYSTEM

National X-Ray Corp. continuously researches and integrates the latest technology in X-ray image detection systems to produce high performance inspection systems that match the specific needs of the customer application. Easily integrated into the Non-Destructive lab, or implemented directly on the production floor, this ergonomic, simple to operate and highly capable X-ray System yields immediate results. Along with the NXC 'IMPS III' series of image processors and equipped with other optional control software packages, this fully configurable system fulfills the requirements of today's SPC/Inspection demands. Digital panels, Digital line arrays and Digital image intensifier systems, along with a wide variety of x-ray systems and manipulator sub-systems, make this system the ideal Non-Destructive Testing system.

Features

- ◆ Basic system includes advanced analog or digital image intensifier systems coupled to high resolution, no-burn camera modules
- ◆ Ultra-compact overall design minimizes floor-space requirements
- ◆ X-Ray energies ranging from 80kV to 225kV depending on application needs
- ◆ Wide dynamic operating range
- ◆ Large loading door for fast, simple test part loading
- ◆ Heavy Duty five-axis test part manipulator eliminates most test part repositioning
- ◆ Basic system requires only standard electrical supply
- ◆ Wide range of optional sub-systems available that include Gulmay & Comet
- ◆ Advanced Image Processing "IMPS III"
- ◆ Image archiving, LAN ready, internet mail compatible, printing ready
- ◆ Digital imaging (film-less) in various formats (a-Si Panels, CMOS detectors, Linear Detectors)
- ◆ American Designed, Build and parts readily available from local vendors

NX522W System Specifications

Application Range

- Penetration of up to 6" of Al, or 1.5" Fe
- Test Sample weights up to 50 lbs
- Sample sizes up to 18" x 24" x 24"H
- ASTM E-155, MIL standards & others

Inspection Enclosure

The NX522 x-ray system is manufactured in compliance with all federal, state and local radiation safety regulations (CFR 1020.40). A sliding part-loading door and a tool-accessed maintenance door are provided for ease of use and are fully safety interlocked. When opened, either or both door actions disable x-ray production. The part-loading door contains a lead-glass (Pb) window to allow the operator to view the interior of the enclosure during inspection routines.

Dimensional Data (approximate):

- Enclosure only: 56" W x 56" Deep x 80" H
- Lead-Glass Viewing Window: 8" W x 8" H
- Maintenance Access Door: 20" W x 28" H
- Control Console:
 - Single bay: 24" W x 27" D x 74" H
 - Double Bay: 46" W x 27" D x 74" H
 - Writing Surface: Add 19" depth
- Approximate Weight of entire system: 5500 lbs

Manipulator

5-Axis type including:

- X-Axis: +/- 12" (24 Ttl)
- Y-Axis: 24"
- Z-Axis: 24"
- Tilt Axis: +/- 15 degrees
- Rotation: 360° CW/CCW (12" diameter Table)
- Capacity: 50 lbs

Control Console

The control console contains all necessary components for system control:

- Microprocessor-based X-ray Controller
- Operator Interface for Imaging and Manipulation
- Writing Surface
- Single or Dual bay
- System Control Electronics

X-ray System

•160kV or 225kV conventional or micro-focus - depending on App.
System Shown: Gulmay FC160, MP-1 Controller

ISO 9001 Compliant

Imaging System

The imaging system is matched to your particular application requirements and could include:

- Digital or Analog Image Intensifiers
- Digital Panel Technology (a-Si, CMOS, etc.)
- Direct View Digital Systems
- Linear Detector Technology

Options

- Image Processing and/or System Control Module
- Full SPC Database Capability
- Image Archiving
- PC Network Capability
- X/Y Image Intensifier X/Y Shutters
- Tubehead Shutter
- Laser Alignment
- Interior Viewing CCTV Camera
- CT Capability

Utilities

- 230 VAC $\pm 10\%$, 60 Hz, 40A, 4-Wire (L1, L2, Neutral, Ground)

The interior of the NX522 System as seen from the parts access door.
